Elsword ara asura skill build pve

This page is for all the characters I've created in Elsword! Here, you can read up on some info and fun facts about them. Enjoy! Characters are listed in order of their creation. Oldest at the top, newest at the bottom.Name: KanadeAngel0 [Code: Nemesis]Name Origin: Tachibana Kanade, the main antagonist from Angel Beats, but she's commonly referred to as "Angel" throughout the series. As for the 0, that's just one of my favorite numbers.Level: 70Skills: Metal Dust AuraSuccess AuraExplosion ImpactAtomic ShieldIron ScrapsGenerate Black HoleQueen's ThroneLunatic ScudFun Fact: KanadeAngel0 is technically not the first character I ever made. My very first character was also a CN who had a different name obviously. However, I knew nothing about Elsword at that time, so by the time that CN reached level 30, she had really bad skills that weren't suited for PvE, her items were terrible, etc. So I decided to start over by deleting that character and creating a new CN instead.Name: HatsuneMiku4 [Grand Archer]Name Origin: Hatsune Miku, a Vocaloid. Vocaloid is a computer program that allows you to synthesize singing. There are various voice banks you can choose from, and they all have different tones and ranges. Hatsune Miku is the most famous of these Vocaloid. Her name means "the first sound from the future". 4 is also another favorite number of mine.Level: 70Skills: Siege Mode (not equipped. I use my combos to enter Siege)Stigma ShotHumming WindFreezing Arrow - StingGuide ArrowWind WallPhoenix StrikeGunniShooter's DestinyFun Fact: My pet's name is KagamineRin, another VocaloidName: IkarosAlpha [Code: Battle Seraph]Name Origin: Ikaros is a character from Sora no Otoshimono, and she's a Alpha-type Angeloid. She's very quiet and expresses little emotion, but her powers are beyond compare. Just like Battle Seraph!Level: 70Skills:El Crystal SpectrumMana ConversionParticle RayEnergetic HeartSweep Rolling - Over ChargePhoton FlareGiga StreamPsychic ArtilleryFun Fact: I made my second Eve before CBS was actually released in NA, but I didn't know CBS wasn't available yet. So I made my Eve, turned her into an Electra, and then I couldn't figure out why I wasn't able to do the job change quest. Then I found out she wasn't going to be released in NA for a while...Another Fun Fact: Amongst all my characters, CBS is the character whose skill tree I've changed the most. I had Taser Pilum for the longest time, but ended up removing it. I also used to have Sweep Rolling - Tri Vulcan, Energy Needles, High-power Electronic Circuit, Linear Divider, and Thousand Star (when you could use it with Energetic Heart) at some point throughout my journeys with CBS. Thankfully, I've had several opportunities to reset my skill tree through events and whatnot.Name: Shinkirou048 [Void Princess]Name Origin: Shinkirou is one of the Nightmare Frames used by Lelouch vi Britannia in Code Geass. Its name means "Mirage" in Japanese. The 8 is added on the end because in Code Geass, the Shinkirou is an eighth-generation Nightmare.Level: 70Skills:TeleportMana StealCircle FlameWisdom AuraHell StoneDeath FieldPlasma Cutter Abyss AngkorFun Fact: Ever since PvP Season 3 revamps came out, I can clear dungeons with just Hell Stone and Mana Steal. That's all I need now. Hell Stone spam! Of course, my other moves are helpful for various situations.Name: SakuraKyoko9 [Yama Raja]Name Origin: Sakura Kyoko is a magical girl from Madoka Magica. She's a very powerful magical girl, and her weapon of choice is a spear. You should be able to figure out why I have the 9 at the end of Ara's name.Level: 65Skills: High SpeedRepelLife SwapWind Wedge (for Secret Wolf Fang Art: Killing Spears)Energy VoidRakshasa Stance 3: Spear PrisonShadoweveHell BlastFun Fact: My first Ara was actually named 09Tails, but I got bored with her and ended up deleting that character. A while later, I decided to give Ara another try and made SakuraKyoko9. Now, YR is one of my favorite classes to play!Another Fun Fact: My awakening charge and awakening time are so high that when I go through dungeons, I'm able to stay in awakening throughout the entire run. I'm usually able to recharge all three awakening beads way before the previous awakening runs out. I can do this with my Eves sometimes, but I'm way more consistent with YR.Name: Vengeance004 [Tactical Trooper]Name Origin: Named after the USS Vengeance, a starship from Star Trek Into Darkness (before you start hating on me, yes, I did watch the original series. In fact, TOS was where I started watching. From there, I went to TNG, DS9, and VOY. I love them all, and I love the new movies as well. Deal with it).Level: 65Skills: Siege Shelling (not equipped. I use my combos to enter Siege)Commander's MarkElastic Bomb - Grenade LauncherWonder WallTactical Field - RaidBig Bang StreamArtillery Strike - Missile ShowerChaos CannonSatellite RainFun Fact: I considered giving up on Chung in the beginning, because he was soooooooooo slow! But I worked through it, and now my TT is awesome! Another Fun Fact: My pet's name is Dreadnought. Kind of a weird name for a Phoru. But he's called that because the USS Vengeance was a Dreadnought-class starship.Name: AkarinAkaza0 [Grand Master]Name Origin: Akaza Akari is the supposed main protagonist of Yuru Yuri, but due to her lack of presence, she is often ignored (ironically, I don't play GM that much). Like Elelis, Akari has red hair. Her friends generally call her "Akarin", hence my GM's name.Level: 60Skills: Rushing SwordProvokePower BreakIron Body - StrongWar PreludeSpiral BlastSaber - ExtinctionSword of VictoryFun Fact: For some reason, I don't like Elsword, but I like Elelis, despite the fact their play styles are practically identical. Maybe it's just their gender.Name: KyoujinEsupa [Lunatic Psyker]Name Origin: "Kyoujin" means lunatic, while "esupa" means esper.Level: 70Skills:Dynamo Configuration - PylonsDynamo Configuration - MagnetronPulse CannonReverse ReactorQuake BusterQuicksilver FrenzyDust AnatomyConquerorFun Fact: Why does Add look so bad in all of his costume items? The only thing he looks good in is his promotional outfit, which of course, isn't permanent. The outfit I have for him (which is a mix of various items from different sets) looks okay, but still not that great.Another Fun Fact: For the longest time, I would get MVP with LP after every single dungeon run. It was such a long streak I lost count. Dozens of MVP titles, going from Bethma to Velder. Sadly, the streak finally broke when I got to Hamel. Oh well, all good things must come to an end someday.Name: TaigaKagamin [Elemental Master]Name Origin: No, it's not a reference to Kuroko no Basuke. My EM is named after two characters: Aisaka Taiga from Toradora! and Hirasgi Kagami, who is called "Kagamin" by Konata, from Lucky Star. Both of them are tsunderes, and Aisha is somewhat of a tsundere, at least in the comics.Level: 57Skills:MeditationTeleportCircle FlameWisdom AuraWater CannonLightning ShowerChain LightningBlaze StepFun Fact: I initially wanted to make an EM that only used water, ice, and lightning attacks, and for the most part, TaigaKagamin does that. My fireballs are iceballs, and most of my skills are water/lightning-related. However, after seeing Blaze Step, I decided to take that over Blizzard Shower. I have the skill note to make Blaze Step match the rest of my EM's color scheme.Another Fun Fact: At first, I was going to name my EM something after ice and lightning, such as "FrozenLight". I ended up naming her after two of my favorite tsunderes. Actually, it kinda fits. Tsunderes have a very cold personality on the outside, which is represented by my EM's ice theme. Name: GeassMaster [Mastermind]Name Origin: Code Geass. Geass is a supernatural power that manifests differently depending on who acquires it. The main character, Lelouch, has the ability to order anyone he has direct eye contact with to do whatever he desires. Essentially, it's mind control.Level: 70Skills:Dynamo Configuration - Rushing DroneDynamo Configuration - Flick DiskDynamo Configuration - Delayed ExplosionInstall - Drone ActivatorInstall - Pulse GatlingPanzer BusterInstall - Ultimate FuryPhantom SeekerFun Fact: I made this Add back when Add was first released, so for the longest time, he was just sitting there, doing nothing, until Arc Tracer finally came out.Name: HomuraMeguca [Dimension Witch]Name Origin: Her name is derived from Madoka Magica. There is a parody of the series called "meduka meguca" and I wanted to call my DW that, but unfortunately, the name was already taken. Homura is one of the main characters from Madoka Magica, and she specializes in manipulating time.Level: 58Skills:TeleportEnergy DrainCircle FlameAcceleration AuraPower AuraGuillotine PressMagical MakeupSuper NovaFun Fact: I have a VP, an EM, and a DW, so this is the first time I've made all three job paths of a certain character.Name: FilNiilvalen7 [Night Watcher]Name Origin: Fil Niilvalen is an elf from the anime "No Game No Life". In the world this series takes place in, elves are ranked seventh in terms of their affinity to magic.Level: 57Skills:Explosion TrapDelayed FireEldrasil's FuryEvokeFatalityTrapping Arrow - BusterGliding StrikePhoenix StrikeFun Fact: Her current costume used to belong to my Grand Archer, but I found a costume that suited GA much better. Therefore, I transferred this costume to NW through the shared bank.Name: 09Tails [Asura]Name Origin: Eun is the nine-tailed fox. Duh.Level: 60Skills:Mana DrainEnergy AbsorptionRapid RaidSpell: Aerial BladesSpell: ThunderShadoweveSpell: StormFox FireFun Fact: I made an Ara back when she was initially released in NA called 09Tails, but ended up deleting her shortly after. This 09Tails was created when Little Specter came out. Ara and Little Specter were released a year apart, so I was amazed no one had taken the username during that time.Name: RogueRougeCA [Crimson Avenger]Name Origin: Rogue is someone who is dishonest, while "rouge" means red in French. CA stands for Crimson Avenger.Level: 56Skills:Rushing SwordInjection StigmaIron Body - StrongDread WeaponEjection BusterBlood CutterBurning PhantomName: Timeless0 [Diabolic Esper]Name Origin: Time... I guess...?Level: 60Skills:Force NovaDynamo Configuration - Space CrackSeal of TimeReverse CircleMoonlight RhapsodyParticle AcceleratorStardust ShowerFun Fact: I initially didn't want to make a DE. He didn't seem like a lot of fun to play due to his OPness. However, it turns out he is pretty fun, even though everyone gets salty at you for using him haha Elsword is an action MMORPG with a manga art style. Today saw the release of a new Job for the one of game's characters: Ara Haan. Today developer KOG Games, developer of Elsword, announced the launch of Ara's new 2nd Job: Asura. As Asura, Ara has come to master her ancestors' Exorcisms Arts. As a combo, players can use 4 now. Job Specific skills in a row to unlock and unleash a new Secret Skill: Pulverization. Once successfully executed, Ara embodies the amalgamation of a master Exorcist and Phantom Fox to unleash hell upon her enemies. Ara's Hyperactive Skill is the Millennium Fox. With this skill, Ara summons the avatar of Eun, the Millennium Fox. The spirit then sweeps the battlefield with darkness and lightning, destroying all who oppose her. A 2.5-diennsional action MMORPG, Elsword features real-time action gameplay. The game features both PvE and PvP modes, and offers co-op for up to four players. PvP content takes place in an arena where players can go head to head. Up to 8 players can brawl at one time. There is a "survival mode" which is a free-for-all match, and team modes that support up to 4 vs. 4 battles. Elsword features nine different characters to play as, each with their own abilities. At level 15, each character has three different job class paths that they can take. Each job path specializes in a different play style with unique skills. There are mainly seven types of skills: Passive, Active, Buff, Special Active, Sealed Skills, Combination Skill, and Hyperactive. All of these skills have different purposes and different activations. Elsword takes place in the land of Elrios, which was brought to life through the power of the gem known as the El Stone. When the El Stone is stolen, the games heroes go to recover it and bring the thieves to justice. Each character has a personal story that is told as they level up. Elsword is available for PC. The game is free-to-play. Changelog #55 ApsaraUpdated Ultimate Spearmanship & Flow of ChiUpdated Opinion for Ultimate SpearmanshipDeviUpdated Energy Enhancement & Chi ReleaseShakti Am I legitimately an idiot or is there no way to get permanent stickers? I don't see them at any NPC that would have this kind of stuff. I don't see them in the Item Mall. There's no quest for them. Unless I'm overlooking something, KoG seriously just implemented a system that isn't even usable long-term. What the heck? 7 months ago I note Permalink Changelog #54 because I'm petty ApsaraUpdated Opinion for ShadoweveDeviUpdated Opinion for ShadoweveUpdated Opinion for Ignition SpearShaktiUpdated Opinion for ShadoweveThese opinions are more detailed than they've ever been out of sheer Fcking spite. Shadoweve's opinion is still pretty short, it's not even an essay, but I talk more about why it's good. Ignition Spear is an essay (but it has pictures) because I'm so fcking petty. It does have a tldr (you have to scroll past the entire essay though or just use ctrl + f and write in tldr once you reach Ignition Spear), but I urge you to read my basically 4 page essay (the length has the pictures and basic skill info included) so you fully understand. Anyway, I spent so much time testing Ignition Spear in various different scenarios that I know more about it than I ever wanted to and I hate it. Changelog #53 ApsaraDeviShaktiKeep in mind the changes to title acquisition do not go into effect in NA/INT until December 16th, 2020. 8 months ago I note Permalink where can I find your Yama Raja guide? by Anonymous Click on the little x in the brackets after this sentence! [x]For my changelogs, just click on the class name (in this case Devi) and it should take you to the proper Google Doc! With the upcoming title requirement changes in KR, they'll be hitting NA a couple weeks afterwards. In the event this somehow erases your progress (which I HOPE it doesn't, but we won't know until the patch hits KR on the 19th), I don't recommend starting any title grind for dungeons earlier than Varnimyr until we know more.
